USE AND CARE INFORMATION

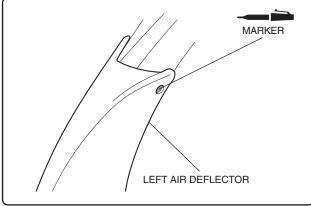

· Check the accessory mounts frequently.

INSTALLATION

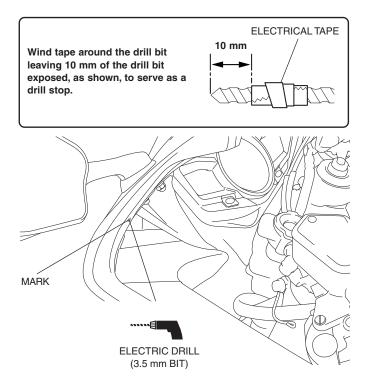

NOTE:

- Heat the bonding surfaces with a hair dryer if the ambient air temperature is below 70°F (21°C).
- The adhesive reaches full strength in 72 hours. Wait at least 24 hours before riding your motorcycle.
- 1. Position the left air deflector as shown and mark the position shown.

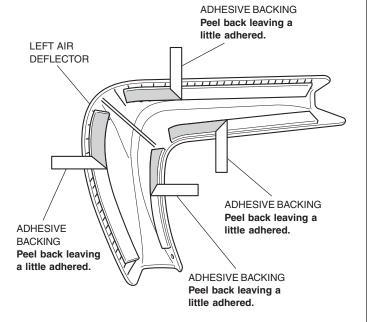

- 2. Drill at the marked point using an electric drill as shown.
 - · Remove any burrs from the edge of the hole.

3. Peel off the adhesive backing on the rear of the left air deflector as shown.

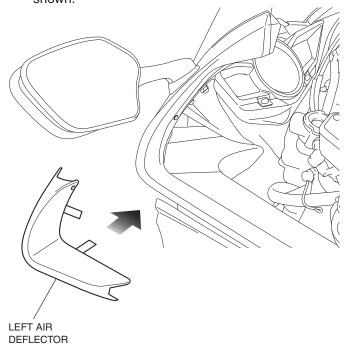

4. Clean the surface of the area shown using isopropyl alcohol.

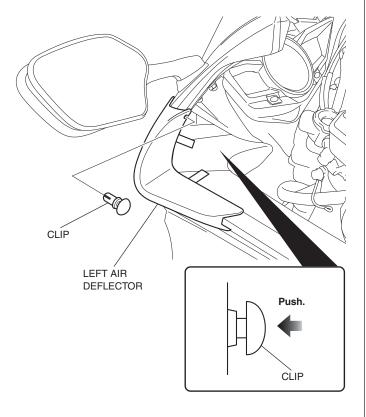

Thoroughly clean the area where the left air deflector will be attached.

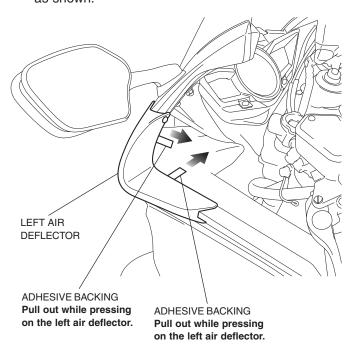

5. Align the mounting hole of the left air deflector with the drilled hole, then attach the left air deflector as shown.

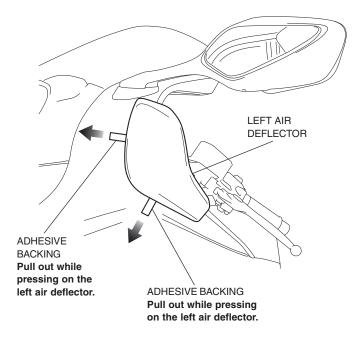

6. Install the clip as shown.

7. Pull out the adhesive backing of the left air deflector as shown.

- 8. Apply pressure to the adhesive backed areas of left air deflector.
- 9. Repeat on the right side.
